

MyChoice USA

F-1 Placement with Homestay Programme

Flexible Study Abroad Option

F-1 visa placements are an ideal opportunity for students to attend an American private school for all 4 years or a public high school for up to one school year in the location of the student's choice. Students attending a public school may continue their education in the USA by either transferring to a private high school or a college or university.

USA Education System

The USA boasts one of the most well-respected education systems in the world; we handpick a selection of high schools across a wide range of states to offer as much choice as possible to our students. Our selection criteria for schools are primarily based on their educational excellence as well as the flexibility with which their curriculum offers the student.

Authentic Family Life

Our F-1 placement programme also includes homestay accommodation with a carefully selected host family in the local community to where the student is attending school. Often host siblings will attend the same school and students are immersed into everyday family life.

Why MyChoice?

Every student is treated as an individual; we invest time into finding the most suitable placement for each one, using our school network throughout the country based on their subject interests.

2018 – 2019 School Year Fees

School districts set the prices for each school. Please speak to a member of our sales team for specific school prices.

Programme Features

- F-1 visa allows choice of US state to study in
- Open-minded, well selected host families who are interested to learn about their exchange student.
- Experienced and dedicated MyChoice team
- Organised 'orientation' available for all students

Please refer to our Agent Manual for further information
